Yes - can teach it	25	60%

Technical Aspects - Search for a program, folder or file on any/all computer drives

No knowledge	1	2%
Kind of - more training needed	7	17%
Yes- can do it	15	36%
Yes - can teach it	19	45%

Technical Aspects - Submit a Help Desk ticket from the Novell launcher

Additional skills and programs

I want to skype. --- I could use more knowledge on MovieMaker, Ipads, Web 2.0 tools, Moodle. Would like additional smart board training. I would like to learn Moodle and what can be done. Interested in increasing knowledge of Web 2.0 tools to see if they would meet my expectations for future expectations. I have attendend training on saving documents as .epub so that they can be accessed through ibooks. na Survey Monkey - but it looks like we can do this from Google docs so maybe it wouldn't be necessary. Use I-movie none I am familiar with ActivInspire and TI Connect.

Comments

I answered the iPod/iPad questions based on my knowledge of the Android market, but scored lower because I'm unfamiliar with the iTunes, etc. market. I need help! I would welcome more training on the computer either after school or on a night that would work for others. I would like to learn more about google and word. I could not make it to the classes that Penny had a little while ago... --- I hear the newest version of Moodle can not be accessed by students...and the older version has limitations. I would really like to know more about google apps. I don't care about moodle Thank you!!
